RESPUESTA DEL GOBIERNO

(184) PREGUNTA ESCRITA CONGRESO

184/22144 **28/03/2025** **63342**

AUTOR/A: FLORES JUBERÍAS, Carlos (GVOX); MEJÍAS SÁNCHEZ, Carina (GVOX); RUEDA PERELLÓ, Patricia (GVOX)

RESPUESTA:

En relación con la iniciativa parlamentaria de referencia, se informa de lo siguiente:

La carretera M-40, como infraestructura de comunicación viaria perteneciente a la Red de Carreteras del Estado, dispone de una longitud aproximada de 61 km en el tronco central, conformado por una sección de 3 ó 4 carriles de circulación por sentido, y de vías laterales en forma de vías de servicio y vías colectoras-distribuidoras, así como de ramales de enlace con múltiples carreteras de titularidad estatal, autonómica o viario local.

De igual modo, como infraestructuras críticas en cuanto a emergencias, dispone de 4 secciones en túnel: El Pardo, Casaquemada, Calzadas Superpuestas y sendos túneles en los ramales de conexión con la autovía A-1.

En concreto, el túnel bidireccional de El Pardo se sitúa entre los pp.kk. 51+346 y 52+106 de la carretera M-40, y fue puesto en servicio en el año 1.996. Dispone de dos tubos, uno por cada sentido de circulación, con 4 carriles por sentido, disponiendo de una longitud efectiva de 760 m.

Del mismo modo, de manera anterior y posterior al sentido del tráfico de la disposición del túnel, según su calzada derecha e izquierda, respectivamente, se disponen sendos carriles de aceleración y deceleración en los ramales de enlace con

dirección hacia la carretera M-30, de titularidad municipal, disponiendo de un enlace entre carreteras de alta intensidad de tráfico.

Especialmente relevante, en ese sentido, es la salida desde la M-40 calzada izquierda hacia la M-30, puesto que su sección característica inicial surge una vez finalizada la sección en túnel.

El Ministerio de Transportes y Movilidad Sostenible dispone de dos estaciones de aforo en el entorno del túnel de El Pardo; concretamente, la estación M-124-0 en el p.k. 54+710, y la estación M-197-0 en el p.k. 47+820, que nos proporcionan medidas de intensidad de tráfico y cuyos datos están publicados dentro de los mapas de tráfico que pone a disposición la Dirección General de Carreteras en la web Ministerial, pudiendo ser consultados los datos discretizados por mes, día, año y sentido de la circulación.

Las situaciones de congestiones son propias de las horas de mayor intensidad de tráfico, o producto de situaciones excepcionales donde la capacidad de la vía se ve mermada para las estaciones.

Para la estación M-124-0, al entenderse más representativa, las situaciones de hora punta en calzada izquierda (descendente) quedan marcadas en el entorno de las 17.00 h - 18.00 h de la tarde, con valores en el entorno de los 5.000 vehículos a la hora, con puntas alrededor de los 5.500 vehículos. En cambio, para meses de menor demanda, como pueden ser julio y agosto, descienden hasta los 3.500 vehículos de media.

Por otro lado, para la calzada derecha (ascendente), las horas punta se caracterizan a primeras horas de la mañana, en torno a las 6.00 h - 8.00 h de la mañana, con valores medios alrededor de los 4.500 vehículos a la hora, con puntas superiores a los 5.000 vehículos.

El menor número de vehículos para el sentido ascendente puede ser debido a que tras el túnel se dispone la salida hacia Ventisquero de la Condensa de manera previa al aforo, lo que puede minorar el tráfico real que circular por el túnel de El Pardo; en cambio, desde la disposición de aforo hasta el túnel en sentido descendente este hecho no se produce.

En cuanto a la variabilidad de los datos desde el año 2019 hasta la actualidad, no se aprecia un aumento o descenso significativo de las situaciones de hora punta, sin considerar el año 2020 e inicios de 2021 por menor movilidad provocada por la

situación de la COVID; del mismo modo, se ve un descenso apreciable en los meses estivales.

Asimismo, es preciso comentar que, en el entorno de los túneles de El Pardo, para la estación de aforo M-124-0, y según los últimos datos publicados del año 2024, fueron 127.425 los vehículos que utilizaron esa sección de la carretera M-40.

Por último, desde el ámbito de competencias del Ministerio del Interior se aportan, en sendos documentos **anexos**, los datos de las retenciones producidas en la carretera de referencia con la periodicidad solicitada.

Madrid, 13 de mayo de 2025
